

Garden maths!

Draw some chalk numbers on the ground, and write over them with paintbrushes and water.

Play 'who can find...' and race to stand on a number first! Jump from number to number for some sensory feedback.

Collect different garden items (leaves, sticks, stones) or toys or balls, and put the right amount on each number.

Use big numbers (10-50) or small numbers (0-10), perhaps your child would like to have a go at writing them too!
