

# Measure

You can use any of these things to measure.

1. Copy or print the table.
2. Look around and find different things to measure.
3. Estimate how long you think they will be.
4. Measure the item

I Measured	I think it will be this long	It measured

Now use this table to answer these questions.

1. What was the longest item you measured?
2. What was the shortest item you measured?
3. Did you have more than 1 item the same length?
4. Where any of your items over 1 metre long?
5. If so what does that item measure in centimetres?
6. What is the difference in length between the longest and shortest item?
7. Find the total length of the longest and shortest item?
8. Chose 5 items and find the total length of them all, what is the answer in centimetres?
9. What is the answer in meters and centimetres?
10. Measure yourself, think about how you are going to do this, what is your height?

Self-Evaluation:

How did you do?

Easy

Tricky

Too hard.
