

## Money - Counting with Coins

Write different amounts in cake cases or on a piece of paper and use coins to make the amounts. Sometimes it is easier to count in pennies, but you might want to add some other coins in too.

Make a caterpillar picture using coins (pennies is a good place to start, but you might want to add in some 2ps and other coins. Add it all up at the end: how much is the caterpillar worth? You could make one too and compare amounts: who has more and who has less?

Good games:
