

Shape hunt.

Make, cut or draw some shapes (circle, square, rectangle, triangle). Lay them out and then find different toys at home that have those shapes on them. Place them on the shape and find some more! Or, you could explore your house and garden to find shapes to take photos of on a iPad or tablet.

Some questions you could ask:

How do you know its a square/circle/triangle? (i.e. it has four sides)

How many **sides** does this shape have?

How many **corners** does this shape have?

Good places to find shape games!
