

Crazy Shaving Foam Colours!

Your child can explore colours and the sense of sight through this fun and messy activity!

You will need:

1. A tray or container
2. Shaving Foam
3. Paint
4. A paint brush or pen/pencil (optional)
5. Paper
6. Ruler

Set the activity up by filling the tray with shaving foam. Then add a few drops of paint. Your child can mix the colours by using either a paintbrush or their fingers. Now let your child explore how the colours mix together and the patterns they create. If you want to capture the patterns, take a piece of paper and put it on top of the shaving foam. Press it down lightly to make sure that all of it is touching the foam. When you're ready, peel the paper off the shaving foam and place it flat on a clean surface. You can use a ruler to scrape the shaving foam off of the paper.

Have fun! 😊
