

# FE TRANSITION SUPPORT

## Message for all current FE Families:

Dear Parents/Carers,

I am aware that this is an anxious time for all our families and that for those families whose young people are due to be leaving this July, their Transition will be accompanied by unprecedented challenges and concerns. As you are already aware, I will continue to have personal contact with you about your young person's transitions and will be working on the best way forward to support your young person with their own personal Transition plan and any associated issues.

For those families with young people in FE who have started Transition planning, I want to reassure you that all Transition work is continuing as best as possible. I am continuing to liaise with Post School providers and any college applications for assessments etc are continuing. I also have maintained contact with Careers South West. I am continuing to liaise with the Preparing for Adulthood team and am working to ensure that transitions into the Adult team from Children's Services are being addressed. I am also in contact with individual Social Care assessors and other relevant professionals to provide any relevant information, (with your consent to share).

I am also here to continue to support you with any other transition related concerns or to talk through any specific issues which you may have or want to discuss.
