

## Sunflower Growth Sequencing

1. Can you match these measurements to the correct picture?

To do this you will need to sequence the pictures from smallest to largest. You can then match them up to the measurements below.

2. How much did it grow in total over the week?

Find the difference between the smallest and largest measurement.

3. What do you notice about how it changes over the week?

Please upload your answers to evidence for learning.

Day 1 14cm

Day 2 16cm

Day 3 16cm new leaf

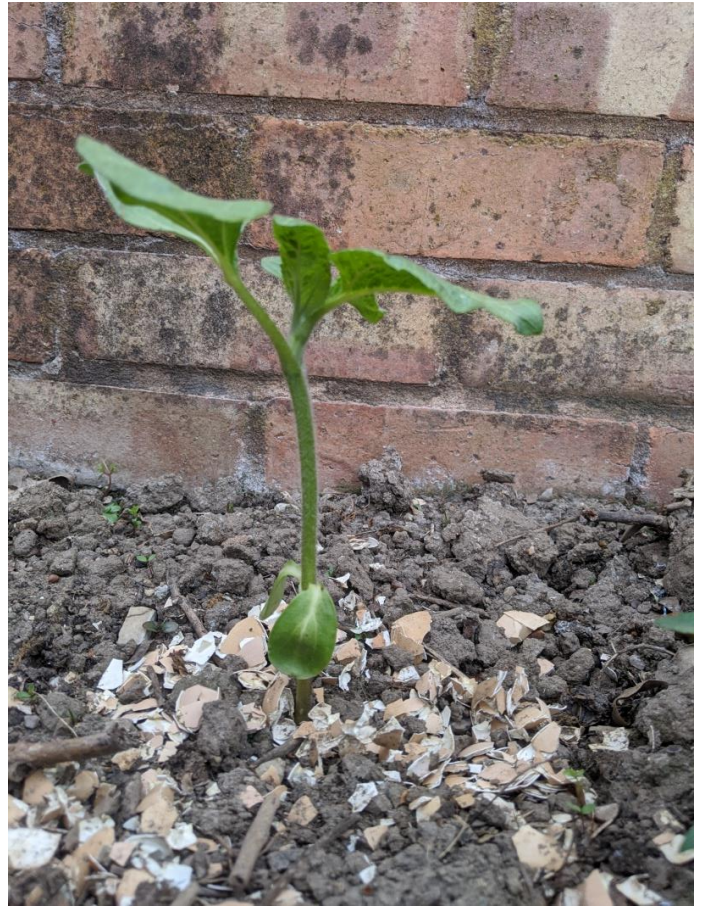

Day 4 17cm

Day 5 17.5cm

Day 6 18.5cm

Day 7 20cm
