Today is

Maths

This week we are thinking about number

Numbers are all around us, can you have a look around your house or when you are out for a walk for any numbers you can see.

Penguin number ordering and counting activity

Activity 1 : Can you sort the number cards into order? Can you order them 1-10? 1-20? 1-30? 1-40? 1-50?

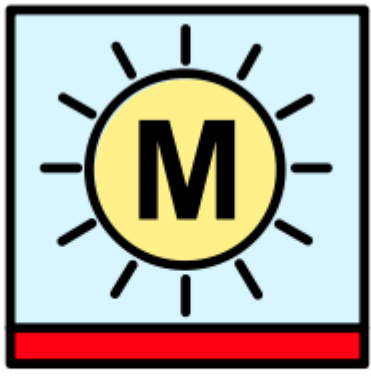

Activity 2 : Can you put some number cards into a bag and pull two numbers out at a time, then make them into a number sentence (e.g $5+3=8$)? Try adding and subtraction and go up to whichever number you feel comfortable with.

Activity 3 : Salt Dough numbers - see separate activity and recipe.

Activity 4 : Number wheel matching game- See separate activity.

Activity 5 : Number bond activity – practice your number bonds to 10 and 20. See separate activities.

Don't forget we love to see your work so please upload onto evidence for learning 😊

Seeing

Sensory

Activity

Colourful bubble foam

You will need:

- Water
- Liquid soap
- Washable paint
- Pour a little water in a bowl, add liquid soap (washing up liquid or shampoo can work well), squirt in some washable paint (bold colours work best rather than pastel).
- Using an electric or hand whisk, whisk them up into bubbly coloured foam. You can use in whatever sized tray or tub you have available.

Explore the colours

Can you mix them together to make new colours?

What colours can you see?

You could use them to make some pictures.
