

**Can you make a clock using materials around your house/garden/local area?**

Here are some ideas to get you started! We'd LOVE to see what yours look like!

Think about:

- How many numbers you will need and where they go.
- What shape you will use.
- How many hands your clock will have and each of their lengths.

CHALLENGE:

- Can you use the hands on your clock to make these times (green = easier red = more tricky!)

<p><b>1 O'clock</b></p> <p><b>3 O'clock</b></p> <p><b>8 O'clock</b></p> <p><b>12 O'clock</b></p>	<p><b>Half past 2</b></p> <p><b>Half past 10</b></p> <p><b>Half past 5</b></p>
