Today is

Maths

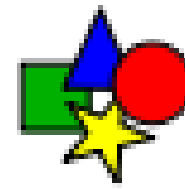

We

are learning

about

Shape

Maths: Shape

This week we are thinking about the different shapes around your house. Make sure you watch the video named 'Can you find a shape?' if you can!

Ideas:

- Can you find 3 different objects that are shaped like a square?
- Can you find 3 different objects that are shaped like a triangle?
- Can you find 3 different objects that are shaped like a circle?
- Can you find 3 different objects shaped like a rectangle?

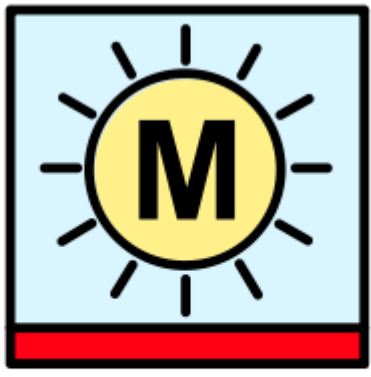

Once you have found them can you draw around them?

Then see if you can answer these questions please.

How many sides does the shape have?

How many corners does the shape have?

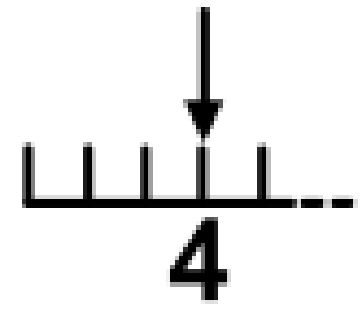

Good luck! You could send us a picture of what you find on Evidence for Learning, we would love to see 😊

Seeing

Sensory

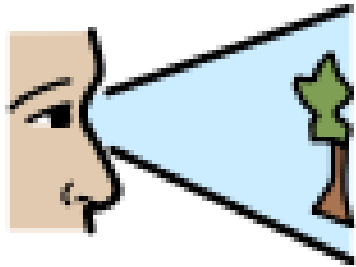

Activity

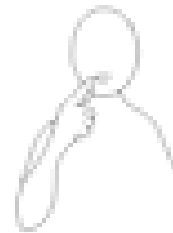

Sensory activities:

see

see

red

red

Senses - Seeing: Red

- Can you spot any red items in your house?
- Can you count how many red cars you see on your walk?
- What happens if you mix tomato ketchup with flour?
- If you want to show us what happened you could take a picture and put it on your Evidence for Learning.
