

Numbers, numbers everywhere!

Go on a number hunt around your home - where can you find numbers? Maybe on your front door, in your kitchen or on the car.

Make a checklist of numbers and tick them off as you go (like below), or you could take photos on a tablet and send it to us on

Evidence for Learning.

Kitchen:

2 3 4 25 31

Outside:

7 9 34 6

Toy box

1 2 3 4 5 6 7 9 10 11 12 3

These are some ideas for checklists. You could go up to 10, 20 or higher if you want to! Some things to think about:

Can your child name the numbers correctly (i.e. do they say 'twenty five' or 'two five')? Can they write the numbers down? Do they know which numbers are more and which are less? Are there any numbers they haven't seen before?

Challenge : Is there a number you see more than others? Which one? How do you know? Can you think of some numbers you haven't seen?
