

Count your wild miles

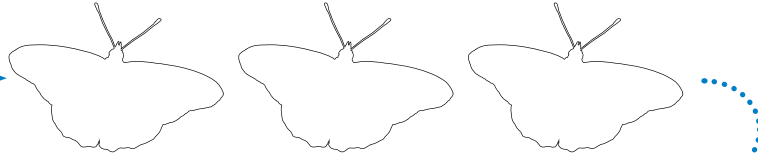

Wildlife doesn't have a car. It uses its wings, fins and feet to travel everywhere. How many wild miles can your family walk and run in a week? Colour a creature for every mile you do between you.

Curlew – 5 miles

Painted lady – 8 miles

Fieldfare – 11 miles

Brent goose – 19 miles

Swift – 30 miles

Wow!

- Each of these wild travellers migrates 100 times the amount we've given here. So curlews fly 500 miles, painted ladies 800 miles, and so on.
