

Build a Bridge Challenge!

It's time for you to be a little engineer! Can you build your own bridge? You can make it as tall and big as you like. You can also use anything you like to build your bridge. You can use wooden blocks, LEGO bricks, LEGO DUPLO bricks, straws, sticks, lollypop sticks, paper, books or tin foil. Be creative and remember to post a picture of your bridge on Evidence for Learning!

To extend this activity:

- Can this bridge hold a toilet paper roll? Can this bridge hold a can of food?
- Place an obstacle on the floor/table and build a bridge that goes over it.
- Can you build a bridge bigger than....?
