

How to make a beanstalk!

Everything you need: cardboard box, 3-4 empty toilet roll tubes, white paper, cotton wool, green paint, glue, black felt tip pen, pencil, paint brush, tape and scissors.

1st step- cut some slits into the bits of toilet roll that you are trying to fit into each other. (This helps them not rip when you're fitting them together)

2nd step- slot all of your toilet rolls into each other to make a tall beanstalk.

3rd step- stand in an old plant pot if you have one, if not just balance it on the end of the toilet roll

4th step- paint the beanstalk (toilet rolls) green.

5th step- while you are waiting for the paint to dry cut a cloud shape out of cardboard and paint one side green.

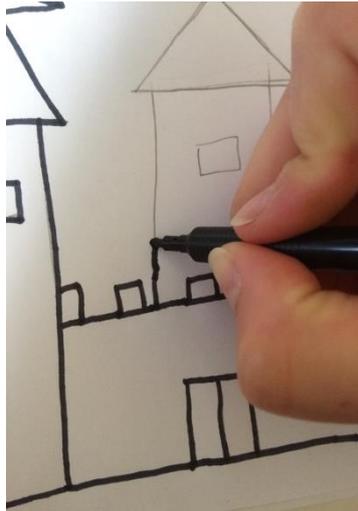

6th step- cover the other side of the cardboard shape cloud in glue and stick your cotton wool balls (could also use toilet roll or cotton pads) to make it look like a cloud on top.

7th step- once it's all dry stick the cloud shape cardboard on your beanstalk green side down and cotton wool side up. You can use masking tape and then paint that green or just use normal tape and leave it.

8th step- draw a simple castle which you can colour in and outline in black pen before sticking onto some cardboard cut into the castle shape to make it more sturdy for when it needs to be stuck on the clouds.

9th step- stick the castle onto the cloud base using tape and a cut out cardboard stand.

10th step- decorate the beanstalk as you want, cut out and colour in some leaves or even better find some in the garden and stick them on the beanstalk.

And there you have it there is your Jack and the beanstalk, beanstalk. Add your own little twists to it and please take photos to put on evidence for learning! Can't wait to see it 😊
