

Recycling Newspapers.

You can use old newspapers to make new structures like the one in the picture.

This one is very big so you might like to start by making something smaller first.

Newspaper Play Structures

You will need:

Lots of newspapers

Sellotape

Hole punch

String or pipe cleaners:

How to make your structure:

1. Tightly roll up a sheet of newspaper to form rod. You will need to roll up lots of sheets of newspaper.
2. Sellotape the ends to stop it from unrolling.
3. Punch holes with a hole puncher on each end of the newspaper rod.
4. Thread a pipe cleaner or string through the holes. When you make the structure use the pipe cleaner or string to join the structure together.

Look at what this structure!!

What structures and shapes can you make?

I am looking forward to seeing your designs!!

Have fun.

Pam
