

# Oliver's Vegetables Number Recognition

## Activity Guide

### You will need:

- Oliver's Vegetables Counting Cards – you may wish to laminate these.
- 7 pegs

### The Activity

Read the story of 'Oliver's Vegetables' by Vivian French with your child. This activity will support the learning and understand of the story.

- Explain that Oliver has been helping his grandpa in the vegetable patch and they are going to help Oliver by counting his vegetables.
- Allow your child to choose a card. Help them to count the number of vegetables on the card. You may need to remind them to say the number and then put their finger on the image. They may also need help counting each vegetable only once.
- Once the vegetables have been counted, can your child identify the correct numeral?
- Talk about the vegetable on the card. What vegetable is it? What could Oliver's grandma make with it?
- Do the same with all of the Counting Cards.
