

## **Plough the fields.**

### **Learning intention:**

Move with confidence, imagination and in safety. Show awareness of space, of themselves and of others.

### **Resources:**

Pictures of tractors ploughing the fields

Outdoor space

Large ride on wheeled vehicles (trikes, cars, bikes)

Lengths of rope laid on the ground in rows, wide enough for a wheeled vehicle to pass through each row, and not bump into anything

### **How to carry out the activity:**

Look at the pictures of fields being ploughed. What is happening in the pictures? Can you see straight lines the ploughing tractor makes? Talk to your adult about how the tractor goes up and down in the field in a straight line to make these rows. Look at the ropes on the ground. These are laid out in rows too. Pretend to be tractor drivers.

Using your ropes you will have a row that you can drive up and down in. Can you keep in your rows to make a straight line like the tractors in the pictures? An adult could help you ride on toy and support you in moving along your rows. Help you to turn round at the end and go back again.

### **Questions to ask/Language to use**

Row, straight, line, up, down, along, within, between.

### **Differentiation**

You could crawl up and down a row, or push a buggy as you move within the ropes. Have small world tractors in the wet sand so you can make tracks in lines with the wheels.

### **Extension**

Make the rows a bit narrower, so you have to be even more careful at moving a in a straight line. If you have enough rope/ ribbon, make the rows turn at each end so you can practice turning within your rows too.
