Who

Lives

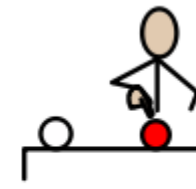

in

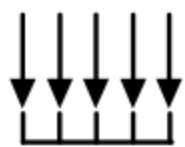

a House

Like

This?

All

animals

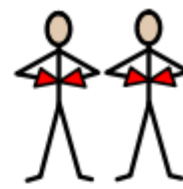

need

a

home.

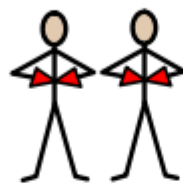

We

are

animals

and

we

need

homes

too!

The

place

an

animal

lives

is

called

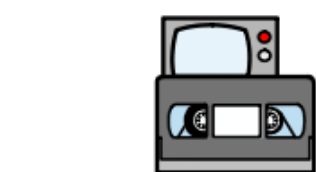

their

habitat.

The **habitat** is the place where an animal lives. It may be **land, water, air, desert or forest** where an animal eats, lives, grows and brings up its babies.

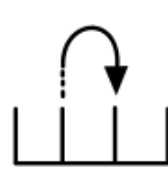

Watch the videos

on

the

next

page

to

learn

how

animals

adapt

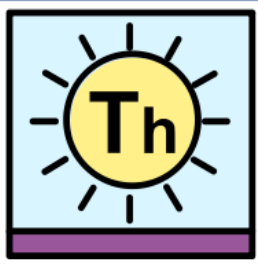

to

their

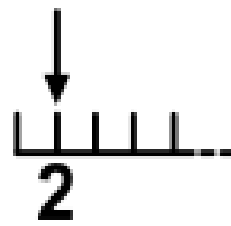

habitats.

Science

Time

for

Your

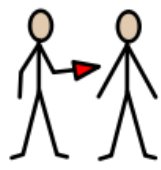

Habitat

Challenge!

Imagine

you

find

a

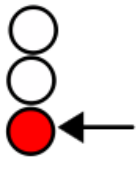

creature

living

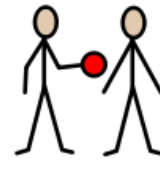

happily

at the bottom

of

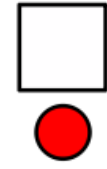

your

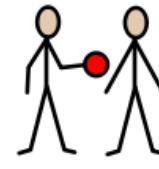

bag,

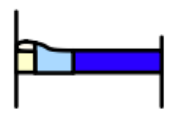

or

under

your

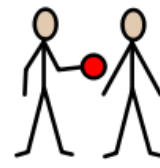

bed,

or

in

your

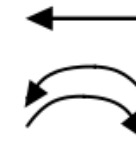

garden shed!

What would it look like?

How has it adapted to its habitat?

What would it eat?

animal

Hand strokes fist held on chest

animal

habitat

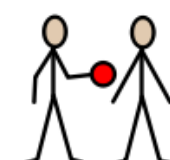

habitat

Now

draw

your

imaginary

creature!
