

# Underwater Scene Collage

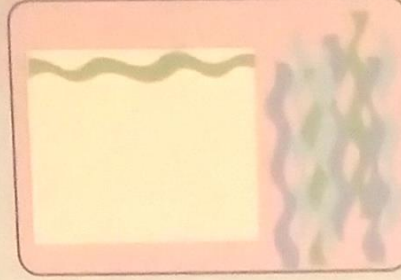

## Making the Background

Materials: Tissue paper, A4 paper for backing, Glue, Coloured card, Scissors

1. Cut lots of wavy strips from different shades of blue tissue paper. Spread glue along the top part of your paper.

2. Press one of the strips of tissue paper onto the glue. Press it down so that it lies smoothly along the top of the paper.

3. Press on more wavy tissue paper strips, overlapping each other. Add more glue and strips until the paper is covered.

4. For bubbles, cut out some circles of different sizes from tissue paper. Glue them on top of the wavy strips.

616

### Big fish

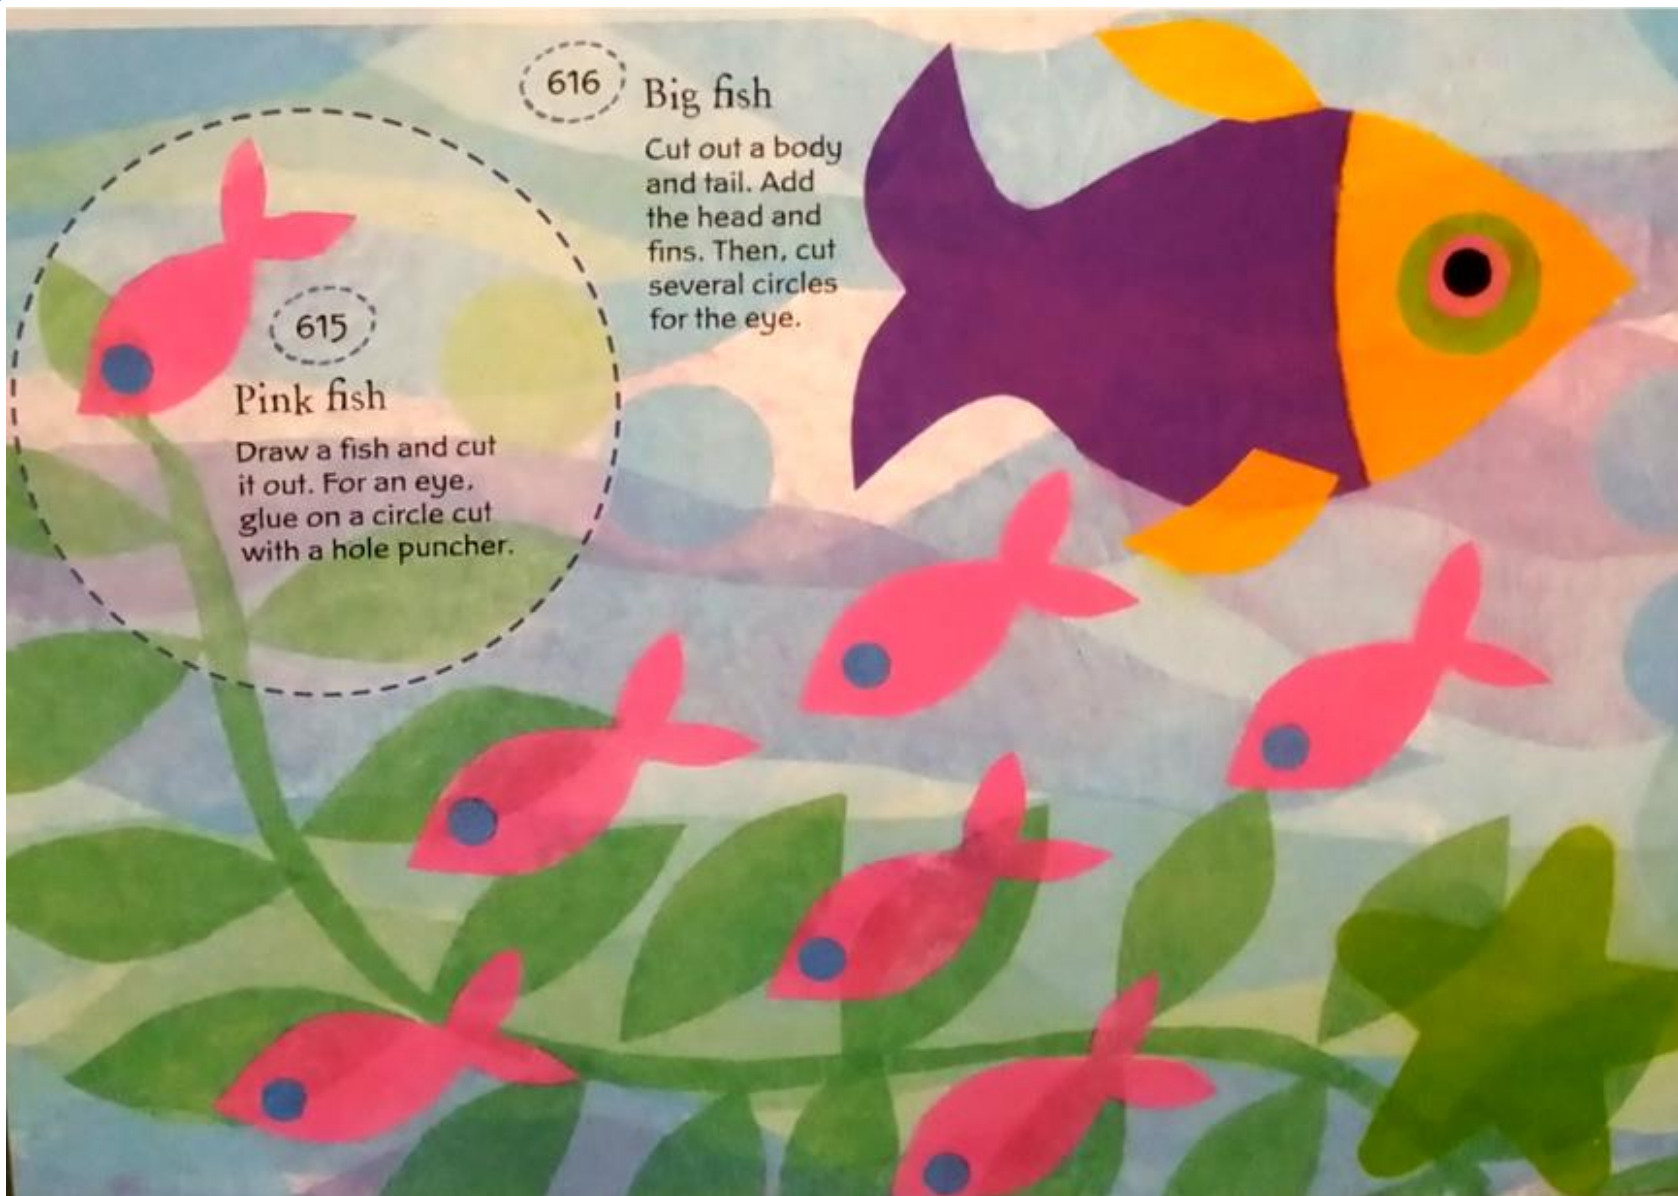

Cut out a body and tail. Add the head and fins. Then, cut several circles for the eye.

615

### Pink fish

Draw a fish and cut it out. For an eye, glue on a circle cut with a hole puncher.

619

### Starfish

Cut out a starfish. You could glue a small shape on top of a larger one.
