

Simple Kite

Easy to fly and easy to build, I don't think it's possible to make a simpler kite than this!

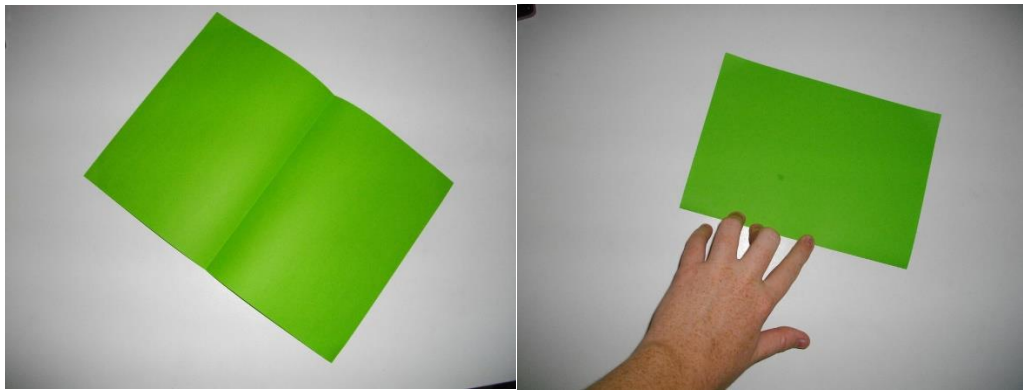

Step 1: Gather Materials:

You will need:

- A rectangular piece of paper - A4 is good.
- String - string, wool or cotton
- Something to make a hole in paper with - I used a hole punch, but feel free to improvise with a pen, a stick or whatever you have on hand.

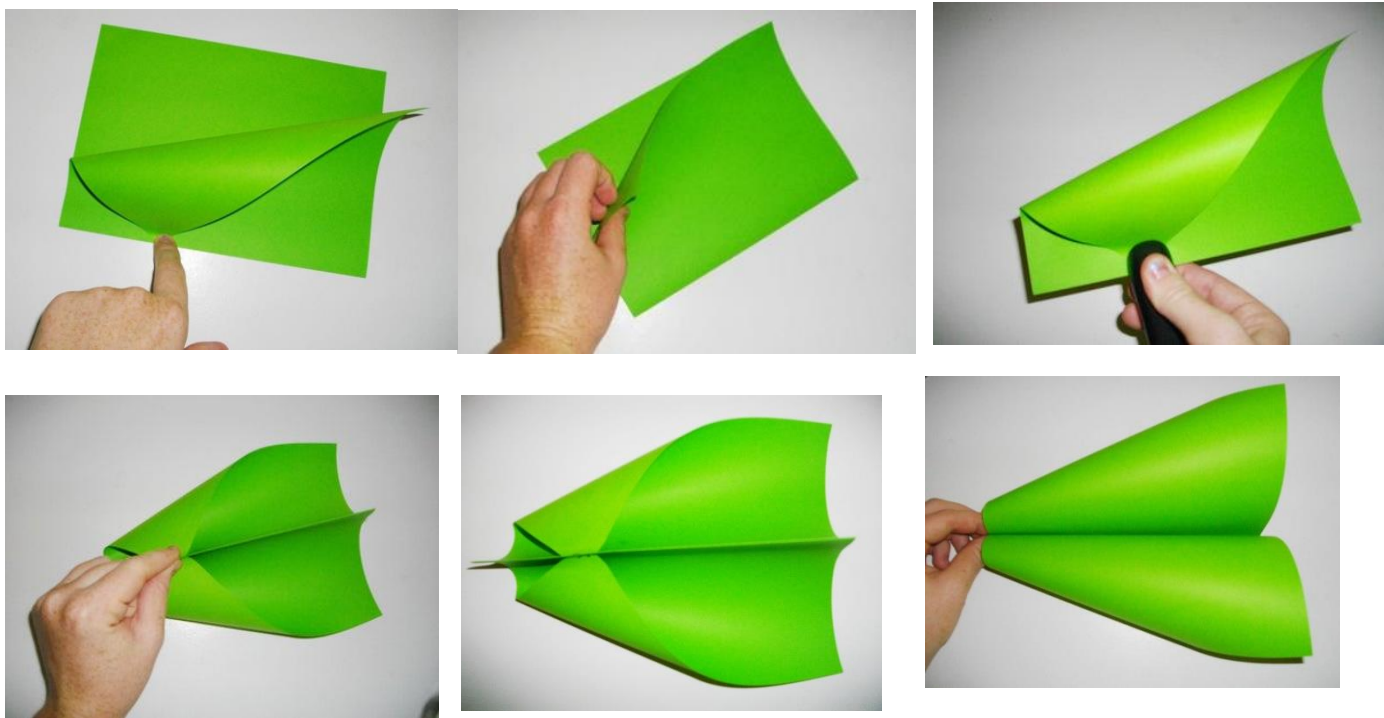

Step 2: Fold Paper in Half Widthways:

Bring the two short sides of your piece of paper together and press along the bend to make a crease.

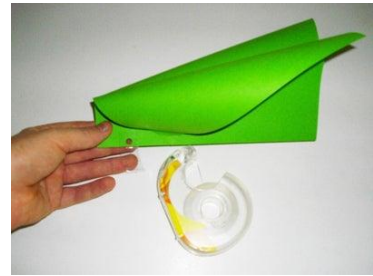

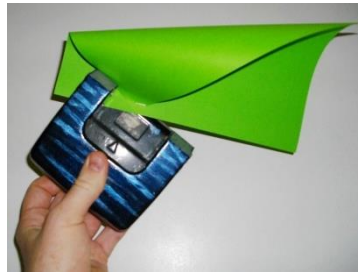

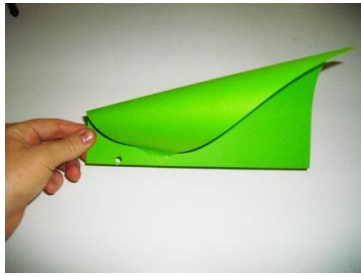

Decorate your kite!

Step 3: Bend the Front Corner of the Top Layer Down to Touch the Crease, Repeat on the Back Layer and Staple:

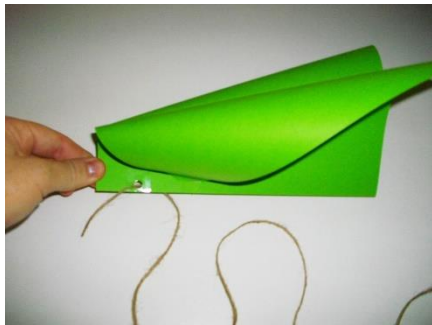

The essential thing with this step is to only bend the corners down. If you fold them the kite will not work.

Step 4: Make a Hole Near the Front of the Crease

The exact location of this hole is not critical, but it will affect the flight characteristics of your kite.

Step 5: Thread String Through Hole and Tie It Off:

The knot used is not important as long as it will keep the string attached to the kite.

Have fun flying your kite!!
