

Making a Fish using recycling with Kirsty

Step 1

Cut the top off of a squash bottle. You also need your glue and either kitchen roll or fabric.

Step 2

Decorate the bottle however you like or with whatever is available. This will be the head and body of your fish so be creative. Could you use stick-on eyes, paint or stickers?

Step 3

If you are using kitchen roll instead of fabric, now is the time to colour or decorate it.

Step 4

Put your kitchen roll /fabric into the decorated bottle.

Step 5

Using another piece of the bottle cut a tail shape. You can make fins as well if you like.

Step 6

Decorate the tail (and fins). I have used recycled wrappers and shiny paper. You could use anything.

Step 7

Stick the tail to the material in the centre of the back of the body.

Step 8

Pierce a hole in the top and tie string through it. You can either glue or knot it to keep it in place.

And there you have your recycled plastic fish!!
